WEB DEVELOPER

Full-stack developer with many years of professional experience working in demanding environments to achieve company aligned goals. Continuous learner with drive to advance my career in the software engineering workspace. Skilled in creative thinking and problem solving, organization, communication, and team collaboration.

TECHNICAL SKILLS

JavaScript - React - Ruby - Ruby on Rails - Postgresql - MySQL - HTML5 - CSS3 - Heroku

TECHNICAL PROJECTS

Workout Builder - Github | Live Link Coming Soon
React App created for users to build their own workouts either from exercises they enter, or others have entered. The workouts can be executed along with a timer to track exercise time.
- Built React front-end with JavaScript and Material UI. App designed using Figma.
- Built API back-end with Ruby on Rails, Postgresql,and Active Record implementing user authentication/authorization and password protection.

Run Data Tracker - Github | Link
React App created to track user's entered data. Once entered they can sort to find optimal stats.
- Built React front-end with JavaScript and Material UI, hosted on Heroku.
- Built API back-end with Ruby on Rails, Postgresql, and Active Record implementing user authentication/authorization and password protection.

Book Review Tracker - Github | Link
React App created for users to enter books that they have read, then enter reviews and keep track of book likes.
- Built React front-end with JavaScript and CSS3, hosted on Heroku.
- Built API back-end with Sinatra and Active Record to create full CRUD app.
